1 Welcome to STand

What this guide covers and how to open the app.

STand helps you prepare for exams with AI-generated questions, an AI tutor called **FenBot**, real exam simulations, teacher-led **classrooms**, and **multiplayer quiz battles** with friends. Everything runs in the browser and your progress is saved to your account.

In this guide: 2 Getting started · 3 Practice solo · 4 FenBot tutor · 5 Study smarter · 6 Classroom for teachers · 7 Classroom for students · 8 Play & social · 9 Rankings & XP · 10 Behind the scenes & privacy · 11 FAQ & help

Opening STand

- 1 Open Chrome or Edge and go to the STand address (for example **<http://localhost:8080>**).
- 2 You will see the welcome screen below. Choose **Sign In** or **Sign Up**.
- 3 Sign up with email + password, or continue with Google.

Getting started

Your dashboard, navigation, and first steps.

After signing in you land on the **Dashboard**. It greets you, shows your **daily goal**, **current streak**, the **daily challenge**, and **Quick Actions** to jump anywhere. Use the left sidebar: **Dashboard** · **FenBot** · **Classroom** · **Practice** · **Document Quiz** · **Exam Sim** · **Review** · **Progress** · **Study** · **Social**.

The screenshot shows the STand Exam Practice dashboard. The left sidebar contains navigation links: Dashboard, FenBot, Classroom, PRACTICE (Practice, Document Quiz, Exam Sim), REVIEW, PROGRESS, STUDY, SOCIAL (Status, Feed, Friends, Chat), and Logout. The main content area displays a greeting 'Good morning, Bright!' with a date and time, a motivational quote, and four main sections: DAILY GOAL (0% completed, 0/50 questions), CURRENT STREAK (0 days), DAILY CHALLENGE (5 questions in Biology), and Quick Actions (Practice, Ask FenBot, Multiplayer, Document Quiz).

STand Exam Practice Bright Ampong

Good morning, Bright! 🌞
Sunday, September 6, 2026 · 09:01 AM
No score yet, no pressure. Just pure potential ready to bloom.

Compete with friends
- Document Quiz**
Upload & quiz smartly

Dashboard — daily goal, streak, daily challenge and quick actions.

Students — first 5 minutes

1. Open **Practice** and generate 15 questions on any topic.
2. Ask **FenBot** to explain one answer.
3. Check **Progress** to see your score.

Teachers — first 5 minutes

1. Open **Classroom** → **Create Room**.
2. Share the class code with students.
3. Add a topic and publish it.

3 Practice solo

AI questions on any topic, exam simulation, and quizzes from your own documents.

Generate a practice set

- 1 Go to **Practice** and type a topic (e.g. "Photosynthesis").
- 2 Pick course sector, education level, question type (**MCQ**, **Theory**, **Fill-in-the-blank**, **True/False**, **Matching**) and number of questions.
- 3 Press **Next** — STand generates the questions with answers and explanations.

Practice setup — topic, sector, level, question type and count.

More ways to practice: **Document Quiz** turns your PDF/DOCX notes into a quiz · **Exam Sim** recreates timed exam conditions · **Bookmarks** saves tricky questions · **History** replays past sessions · **Search** finds anything you practiced before · **Import** brings in your own question lists.

4 Meet FenBot, your AI tutor

Ask anything — get fast answers or deep, step-by-step teaching.

Open **FenBot** from the sidebar. Type a question — or tap the **microphone** and speak. FenBot streams the answer live, can **read it aloud**, and remembers each conversation so you can return later.

FenBot — Teach mode, voice input, and suggested starters.

Mode	Use it when...
Teach	You want a full lesson: explanation, examples, checks.
Fast (Short / Medium / Detailed)	You want a quick answer before an exam.

Tips: ask follow-ups (“give me an example”, “quiz me on this”), regenerate an answer with ↺, copy useful replies, and switch your language — FenBot answers entirely in it.

5

Study smarter

Plans, progress charts, weak areas and achievements keep you consistent.

Study Plans

Set goals and track your study streaks

Plan with AI

Create Plan

No study plans yet

Create a plan to set goals and track progress

Study Plans — or generate one with AI via “Plan with AI”.

Study Plans

Set goals and target dates manually, or press **Plan with AI** and describe your exam — STand drafts the schedule and streak targets.

Progress & Weak Areas

Charts show scores over time per subject; **Weak Areas** lists topics to revisit, and **Compare** pits two sessions side by side.

Complete practice sessions to see your progress

Start Practicing

Progress — scores, trends and mastery per subject.

Achievements reward streaks, perfect scores and multiplayer wins — collect badges as you learn.

Classroom for teachers

Create a room, publish AI-assisted topics, assess and track the class.

CLASSROOM

Teacher-controlled curriculum. AI-powered teaching. Human-supervised learning.

CREATE ROOM

For teachers and instructors. Set up a private or institutional classroom.

JOIN ROOM

For students. Enter your class code to join a classroom.

DASHBOARD

View classroom stats, AI insights & student progress.

Classroom home — Create Room (teachers), Join Room (students), Dashboard (overview).

- 1 **Create Room** — name it, set course, level and term. You get a **class code** to share.
- 2 **Add topics** — upload notes (PDF/DOCX) or write an outline; AI drafts objectives, lessons, examples, knowledge checks and practice questions for your review.
- 3 **Assess** — build assessments (same, randomized or pool modes), schedule and release them.
- 4 **Track** — attendance, announcements, per-student mastery levels, class analytics and AI insights on the dashboard.

Rooms support physical, fully-online and hybrid setups, with teacher / assistant / student roles.

7 Classroom for students

Join with a code, learn topic by topic, take assessments.

- 1 Open **Classroom** → **Join Room** and enter the class code from your teacher.
- 2 Open **Learn** → **Topics** and read each lesson: objectives, key terms, simple + advanced explanations, examples and knowledge checks.
- 3 Take **Assessments** before the deadline; view results and feedback when released.
- 4 Watch **Progress** (mastery: struggling → developing → proficient → mastering), **Attendance** and **Announcements**.

Good habits: finish every knowledge check, retry weak topics flagged in red, and ask FenBot to re-explain anything marked "developing".

Play & learn together

Real-time quiz battles, tournaments, study groups and chat.

Multiplayer Arena — 1v1, Team, Tournament, Blitz, Marathon, Survival.

Game modes

1v1 Battle · Team Battle · Tournament brackets · Blitz (10 in 60s) · Marathon (100 questions) · Survival (one mistake ends it).

Social

Friends & requests · Feed posts · 1-to-1 and group chat with media · Status stories · Study Groups for group revision.

Share a room code to invite friends; live chat and reactions run during matches.

9

Rankings, XP & levels

Every correct answer earns XP and climbs the leaderboard.

Correct Answer+10 XP

Perfect Answer+20 XP

Daily Challenge+100 XP

Global Rankings — rank, level, streaks, statistics and the XP table.

Action	Reward
Correct answer	+10 XP
Perfect answer	+20 XP
Daily challenge	+100 XP
Multiplayer win	+200 XP
7-day streak	+300 XP

Tiers run **Bronze** → **Silver** → **Gold** → **Platinum** → **Diamond** → **Mythic**; leaderboards split overall, weekly, streak, country, school, friends and subject.

Behind the scenes & privacy

Plain-language notes on how STand works and where your data lives.

How the AI works: your questions go to a small proxy server included with STand, which forwards them to the AI provider. Your secret keys stay on the server — never in the browser.

Where data lives: accounts and sign-in use Firebase Authentication; classrooms, chats, posts and progress use Cloud Firestore; uploads use Cloud Storage. Your own browser also keeps a local copy so pages load fast.

Teachers: you control your rooms (members, roles, archived/draft states). **Students:** only joined rooms can see your classroom activity; profile, privacy and notification settings are under **Settings → Privacy**.

Technical stack for the curious: Vite + React + TypeScript + Tailwind CSS + Recharts + Firebase + Groq AI. Local dev runs the AI proxy on port 4200 and the web app on port 8080.

11 FAQ & help

Quick fixes for the most common issues.

“Sorry, I encountered an error” in FenBot

The AI proxy or key may be down. Make sure the backend server is running and the AI key is valid, then try again. Avoid spamming Regenerate while a reply is still streaming.

Blank page or endless “Loading...”

Wait a few seconds on first load (the app compiles), then hard-refresh (Ctrl+Shift+R). Use Chrome or Edge.

Can’t join a classroom?

Codes are uppercase — check for O/0 mix-ups, confirm you’re signed in, and ask the teacher that the room is active (not archived).

For the person running STand: start the AI proxy (**node server.js**, port 4200) and the web app (**npm run dev**, port 8080). Production needs the AI key set as an environment variable, then redeploy.
